

SCOPE OF THE QUALIFICATION EXAMINATION - EARTH AND RELATED ENVIRONMENTAL SCIENCES

Doctoral School of
Exact and Natural
Sciences

The scope of the qualification examination will be related to the subject of the candidate's future PhD project.

The scope of the exam, depending on the initial research project proposal, may include:

- biogeography;
- groundwater dynamics;
- atmospheric physics;
- soil science;
- geochemistry;
- geoecology;
- geophysics;
- geoinformatics and cartography;
- quaternary geology;
- economic geology;
- geohazard;
- historical and regional geology;
- hydrogeochemistry;
- engineering geology;
- structural geology;
- ore geology;
- geomechanics;
- geomorphology;
- hydrogeology;
- hydrology;
- climatology;
- soil mechanics;
- mineralogy;

- environment protection;
- paleontology;
- petrology;
- sedimentology;
- remote sensing.
